IN EVERY HOME THESE FIRST DAYS of winter, when summer has loosened to hold the question of what sort of ICE to use is one of utmost importance. Hygienic Ice is made of pure spring water, this water being of a quality surpassed by no other in the District of Columbia. In order to secure clearness of the ice the water is distilled and then filtered. This serves to absolutely protect those who use Hygienic Ice from the dangers to health which attend the use of ice which is impure or whose origin is uncertain, as no unhealthful rerms can stand both extremes of the heat of distillation and of freezing cold. The management invite the fullest inspection of every process in every part of its works by intellicent, fair-minded people, assured that thereafter Hygienic lee will be preferred to any other for every home purpose. Extes are no higher than for other ice. A call by postal or by telephone (No. 44) will be quickly responded to. Office No. 419 9th st. n. w.

WE NEVER SHIEK A CONTRACT.

Did it ever occur to you as strange that quite often there is a very wide difference in the amount of bids submitted for the same work? This is caused by one of two things—is morance in figuring upon the plans and specifications or the attempt of "novices" to secure the contract regardless of their ability to fulfill their agreements, trusting to luck, poor glass or Providence to see them through. We give you an intelligent bid and prompt, intelligent service at the lowest figures consistent therewith.
